

## HOW TO CLONE A USER ROLE

In System, there is a feature called *Security System Role* where it is use to set an Access Rights for a particular Department, Group or Team. Also, there is a function in the system that a Security System Role can be just *Cloned*. This will be helpful specially during a setup whereas a Security System Role has just the same Set Access Rights with the other.

Under Maintenance > User Roles

						QNE Optim								
File	View	Tools	Inqu	iry Mair	ntenance									
2			Ρ	6	ŀ			6		Æ	Sec. S			2
My Detai	ls User Roles	Users	Projects	Cost Centres	Financial Period	Valid Posting Periods	Default Interface Accounts	Currencies	Terms	Areas		Running Numbers	Posting Account Groups	User Default Form Format
Default y			Maintenance											

Select on the Security System Role that needs to be Cloned

Then rename the Security System Role, and edit if needed then click *Save*.
