

How to Perform System Update in Workstation

Procedure:

Browse to the folder where you have saved the System Updater and double-click the Setup file (e.g. *Setup_2021.1.0.2_Recompiled 5.exe*).

Note: If you don't have the Updater yet for the latest version, please request from us.

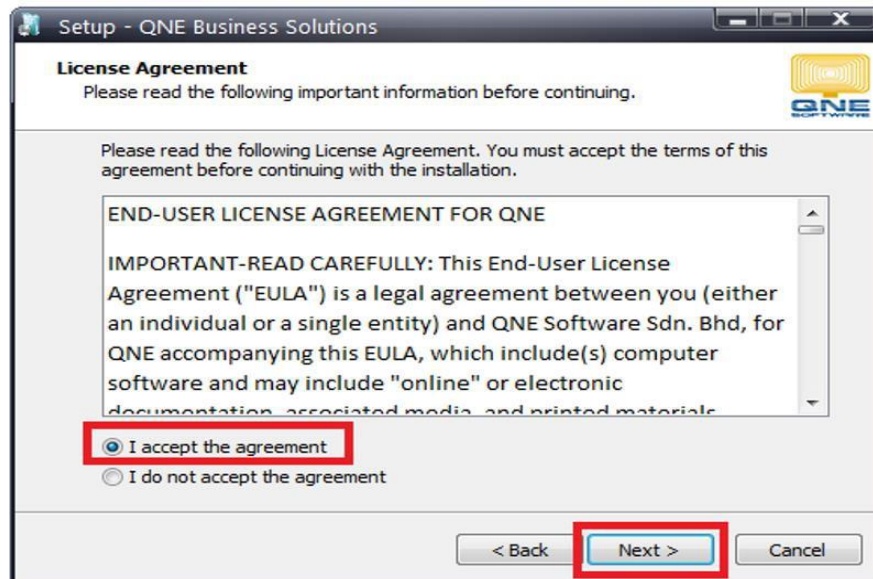

QNE Setup will prompt > Click **OK**.

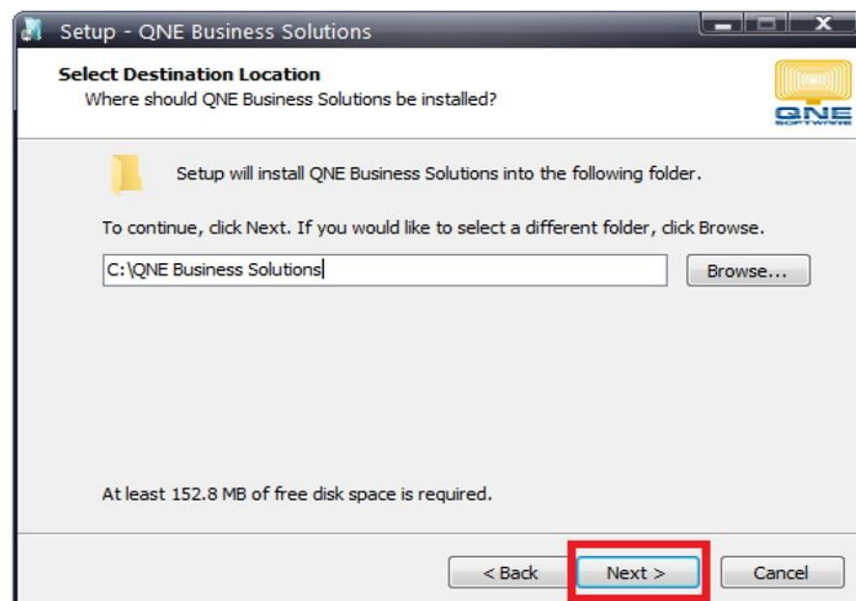

Click **Next**.

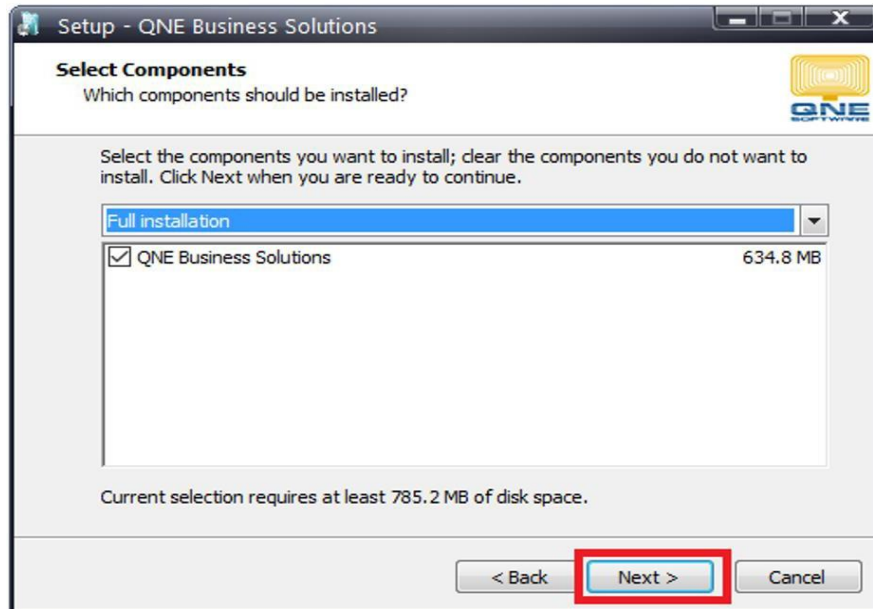

Choose **I accept the agreement** > Click **Next**.

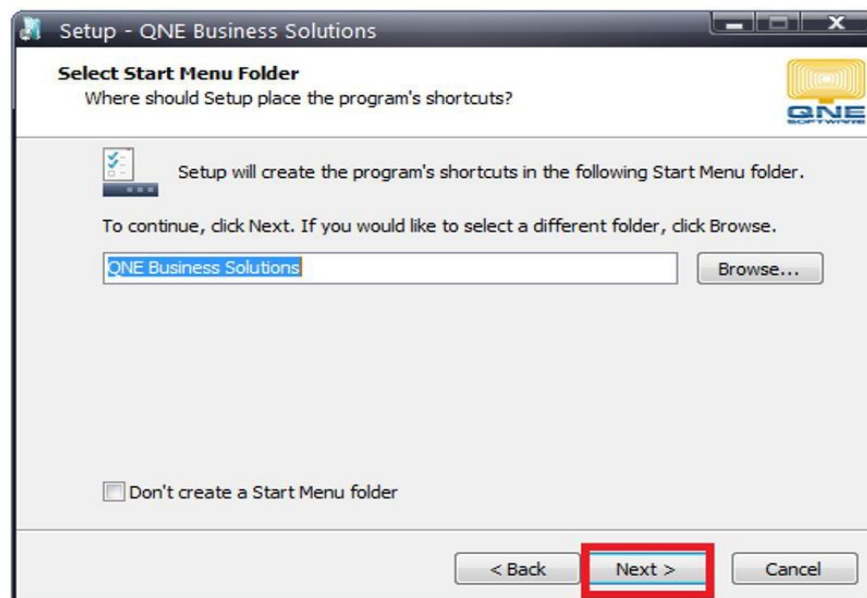

By default, the update will be installed in the following folder. If your QNE system has been installed in a different folder, click the Browse button and select the folder. Click **Next**.

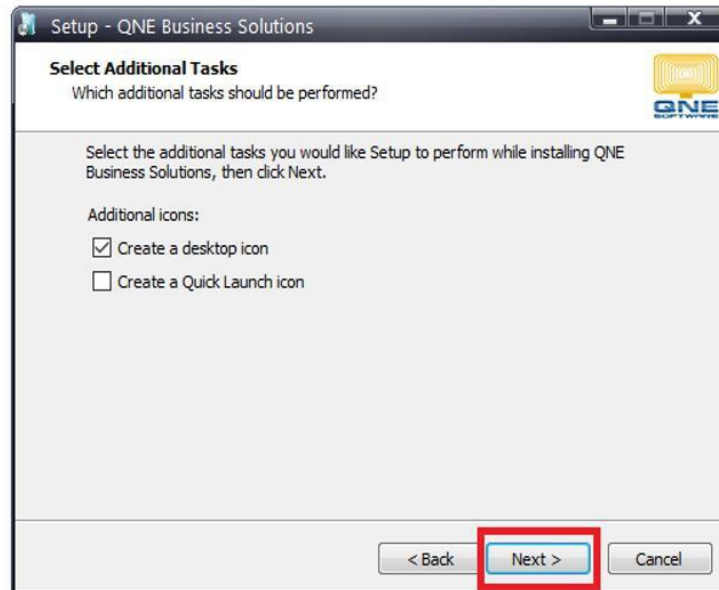

Tick QNE Business Solutions only and click **Next**.

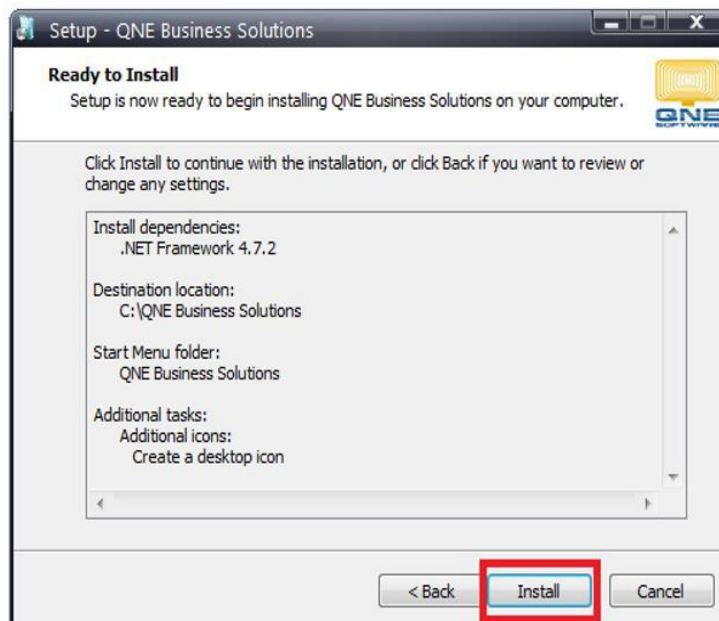

Click **Next**.

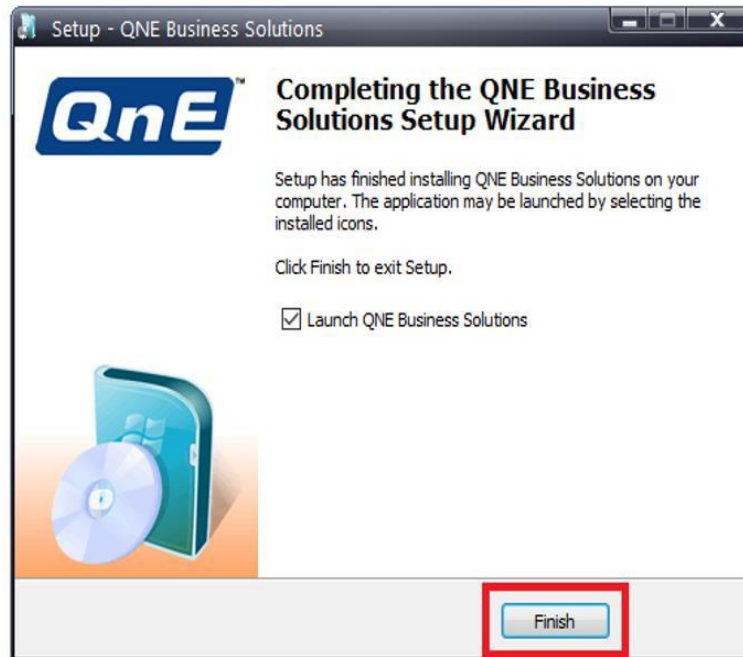

Click **Next**.

Click **Install**.

Once completed, click **Finish**.

Before logging in to the Database(s), please check with your IT/QNE Administrator to ensure that the Database(s) has already been upgraded to the same version in the Server.

NOTE:

Should you need further assistance on this please send us an email to support@qne.com.ph or you may log a ticket via qnesupportph.freshdesk.com
