

How to Allow and to Restrict Users from Upgrading the Database

Overview:

Whenever you are updating the version of your QNE Optimum Application, upgrading your Database(s) to the same version shall follow. Upgrading the database(s) is usually done in the Server Computer and by designated person(s) such as your IT personnel. As a security precaution, it is recommended to remove this access from non-designated users.

Procedure:

1. Go to **Maintenance > User Roles**.

2. To **allow** access for Database Upgrade, double-click the **System Role** that the users are assigned to (e.g. *IT Dept.*).

Security System Role	
Name	Description
Administrator	System predefined role with full access
Default	System predefined role with minimum required permissions
IT Dept.	IT Dept.
Manager	Manager
Purchase	Purchase Department
Sales	Sales Department

Under **Other Operations** tab, tick the **Allow Checkbox** for Database Upgrade. Click **Save and Close** and click **No** on the Alert prompt.

- To **restrict** access from Upgrading the Database, double-click the **System Role** that the users are assigned to (e.g. *Sales Department*).

Security System Role	
Name	Description
Administrator	System predefined role with full access
Default	System predefined role with minimum required permissions
IT Dept.	IT Dept.
Manager	Manager
Purchase	Purchase Department
Sales	Sales Department

Under **Other Operations** tab, untick the **Allow Checkbox** for Database Upgrade. Click **Save and Close** and click **No** on the Alert prompt.

The screenshot shows the 'Security System Role' configuration window. The 'Other Operations' tab is active, and the 'Database Upgrade' operation is selected. The 'Allow' checkbox for 'Database Upgrade' is circled in red. An 'Alert' dialog box is open, asking 'Do you want to get override by View Unit Cost and View Selling Price?'. The 'No' button in the dialog is also circled in red.

Operation	Allow
Database Backup	<input type="checkbox"/>
Database Restore	<input type="checkbox"/>
Database Upgrade	<input type="checkbox"/>

Application:

Allowed - the user is able to perform database upgrade

Restricted - Access Denied dialog box will display
